Product group description

System press tools for all Viega press connector systems. System press tools consisting of: press machine, press jaw, press ring, press chain and (hinged) adapter jaw. These system press tools have been developed and tailored specifically for the installation of Viega press connector systems. The functional safety of Viega press connector systems depends primarily on the faultless condition of the press tools used.

Marking

Manufacturer, pipe dimension or system name

Note

The Viega system press tools have been developed and tailored specifically for the installation of Viega press connector systems. Viega does not check whether these system press tools can be used to press other manufacturers' systems. In particular, no statement can be made on whether it is possible to create permanently leakproof connections in this way. Detailed information about applications, restrictions and national standards and directives can be found in the product information, either printed or on the Viega website.

Maintenance instructions

Press machines generate a specified pressure for the pressing.

To guarantee operational safety, a leakproof hydraulic system is required. Natural wear and tear on such heavily used components, however, is unavoidable.

To ensure the continuous operational safety and reliability of the system press machines, these have to be maintained regularly by authorized service partners.

For addresses see operating instructions, instructions for care of Viega system press tools or Viega website. Usually, tools are sent for maintenance to the authorised service partners specified by Viega, or maintained during local promotions at service partners at the specialist wholesaler.

We strongly recommend having press jaws, press rings, press chains and (hinged) adapter jaws checked during press machine maintenance.

By this, moving parts are lubricated, pressing contours are reworked and the press jaws, rings, chains and (hinged) adapter jaws are checked for damage and dimensional accuracy.

Please fulfil your duty of care and follow these maintenance instructions!

The general principle "safety through maintenance" applies!

From 2024, the press jaws and hinged adapter jaws will have a service sticker with QR code.

This refers to the instructions for maintenance and care of the Viega system press jaws in the online catalogue.

Service intervals

Pressgun 6 Plus and Pressgun Picco 6 Plus: available at any time via Viega Tool Services app or display after 40,000 pressings, safety shutdown after a further 2,000 pressings – but after 4 years at the latest – whichever occurs first.

Pressgun 6 and Picco 6: display after 30,000 pressings, safety shutdown after a further 2,000 pressings – but after 4 years at the latest – whichever occurs first.

Pressgun 6 B: at least every 2 years.

Pressgun 5: Display after 40,000 pressings, safety shutdown after a further 2,000 pressings or after 4 years at the latest – whichever comes first.

Pressgun Picco and Pressgun 4E and 4B: Display after 30,000 pressings, safety shutdown after a further 2,000 pressings or 4 years at the latest, whichever comes first.

Type PT3-AH, Picco and Type PT3-H/EH: LED display after 20,000 pressings, safety shutdown after a further 2,000 pressings or 4 years at the latest, whichever occurs first.

Type 2: at least every 2 years.

Type 1: at least once a year.

Press jaw, ring, chain and (hinged) adapter jaw: every 2 years.

Compatibility

Picco (24 kN): press jaws and rings compatible with press machines Picco and Pressgun Picco, Picco 6 and Picco 6 Plus

PT2 (32 kN): press jaws, rings and chains compatible with press machines type 2 (PT2), PT3-H, PT3-AH, PT3-EH and Pressgun 4E, 4B and 5, 6B, 6 and 6 Plus

hinged adapter jaw P1 (article 622 657) for Picco: up to and including d32 or d35 and D $\frac{3}{4}$

hinged adapter jaw Z1 (article 472 733) for PT2: up to and including d32 or d35 and D $\frac{3}{4}$

hinged adapter jaw Z2 (article 472 740) for PT2: all greater pipe dimensions up to and including d108.0 or D2

press Booster Z3 (article 753 924) for PT2: Megapress XL press rings D2 $\frac{1}{2}$, D3 and D4
